Dear Librarian

Welcome to the 8th issue of the Lyell news update.

If you have any questions or feedback, we'd love to hear from you!

Similarly, if you have any news for the next issue of this newsletter,

[send it to us](#) and we'd be happy to share it.

Best wishes,

[Anne Davenport](#)

Head of Sales, Marketing & Distribution

JM publishes its first Online First paper

Journal of Micropalaeontology has recently published 3 Online First papers.

[Late Quaternary deep-sea ostracod taxonomy of the eastern North Atlantic Ocean, Moriaki](#)

[Yasuhara and Hisayo Okahashi.](#)

[A pelagic myodocopid ostracod from the Silurian of Arctic Russia, Vincent Perrier, Olga K. Bogolepova, Alexander P. Gubanov, David J. Siveter and Mark Williams](#)

[Development of the freeze-thaw processing technique for disaggregation of indurated mudrocks and enhanced recovery of calcareous microfossils, Alice E. Kennedy and Angela L. Coe](#)

Online First is a feature offered through the Geological Society's electronic content platform, the [Lyell Collection](#), enabling articles to appear online soon after they have been accepted for publication and ahead of the printed volume or issue. Online First is now available for all journals on the Lyell collection plus the Special Publications book series.

Save time and effort with JUSP

If you haven't already made use of JUSP, then now is the time. It will give you a simple way of analysing the value and impact of your electronic journal subscriptions through accurate and comparable usage statistics. JUSP saves academic libraries time and duplicated

effort by providing a single gateway for you to access your usage statistics from GSL and other participating publishers.

A reminder to update your login details

We have recently discovered that some illegal websites are allowing access through to our content. Essentially, these sites have found a way of accessing institutional subscriber systems, either by being given the password or by guessing it. Once accessed, users are able to navigate any subscription content, and other functions of the system might also be accessible.

We advise that all our institutional customers:

1. Check for open proxies set up from unknown users and block access
2. Regularly change system login details to protect holdings

If we think your institutional network may have been compromised will we contact you to let you know however we are unable to continually monitor activity levels and may not spot this activity, your help in keeping the content safe is much appreciated.

If you would like more information please do [get in touch with us](#).

New CHEST agreement for Geofacets

Geofacets, the online map resource from Elsevier that contains over 375,000 maps from the GSL and other publishers, is now available to academic institutions via Eduserve.

Geofacets is a web-based application for geoscientists that combines advanced search capabilities and peer-reviewed maps from trusted providers that are easy to integrate into GIS and other programs.

To enquire about purchasing Geofacets for your library, [visit the Eduserve website](#).

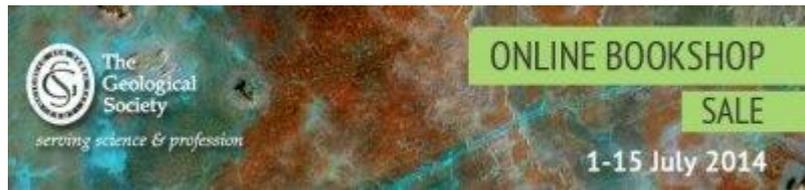

For more information on Geofacets, [visit the Elsevier website](#).

INASP

A little reminder about the GSL's involvement in Schlumberger's access for developing countries scheme. While libraries and corporations must pay to access the Lyell Collection, academic institutions and corporations in developing countries may be eligible for free access under a scheme generously funded by Schlumberger. The scheme is run by the International Network for the Availability of Scientific Publications. [More information](#)

Online Bookshop Sale - now on!

We are currently holding a sale of selected publications on our online bookshop. Make your selection from 40 titles priced at £25 or £35 each. Sale ends midnight on Tuesday 15th July 2014.
