GSL eBooks now available on the GSW eBooks Collection

The Geological Society of London Publishing House is proud to be a part of the first GeoScienceWorld eBook Collection on the HighWire Open Platform. 250 GSL publications are now live on the platform as part of the 713 book collection, with an overall total of 1,050 ebooks expected by the end of summer 2014.

The GSW eBook Collections launched on 22nd July and is cross searchable and interlinked with 120,000 articles in GSW's Millennium and Archive Journals Collections and 3.3-million records from the American Geosciences Institute (AGI)'s GeoRef database.

“With the addition of the eBooks Collections to our journals and AGI’s GeoRef, GSW now provides sophisticated integration, search, and discovery capabilities for the most respected earth science content online,” says Alix Vance, C.E.O. of GeoScienceWorld. *“It furthers our mission to expand global access to scholarly resources using the most up-to-date technology and research tools.”*

Neal Marriott, Director of Publishing, Library and Information Services at GSL says: *“We are proud to offer 250 eBooks from GSL in the new GeoScienceWorld eBook Collection. GSW is a non-profit, collaborative and comprehensive Internet resource for research and communications in the Earth sciences and the addition of ebooks ensures the discoverability of this high quality content. We will continue to support the eBook Collection by the regular addition of new content. Congratulations to the Publishing House and GeoScienceWorld teams who successfully managed this project.”*

Features of the new eBook platform include:

- Advanced search allows users to construct a query by content type and/or conditional options (such as title, abstract, full text, date range or DOI)
- Results are displayed with facet delimiters, including content type, publisher, eBook series (if applicable), GeoRef subject, geologic time, and publication date.
- Figures are included in search results, and the ebook reader features a figure viewer.

- GeoRef links are embedded in many chapters.
- PDF downloads for chapters, front matter, back matter, and additional assets.
- Email distribution is included in content-sharing options.
- Citation Manager supports the most popular citation services: BibText, Bookends, EasyBib, EndNote, Mendeley, Papers, Ref Manager, RefWorks, and Zotero.
- Browsing by subject and by publisher sections help users quickly find the materials they need.
